

Geretsried

State Query of Former Armament Factories

Regierungsbaumeister
SCHLEGEL

Client

Regierung von Oberbayern
[Government of Upper Bavaria]

Period

1993 - 1996

Project Cost

2.500.000 €

Abstract

The State's investigation program has particularly followed the objective to clarify suspicious hazardous armament waste deposits, which could endanger the inhabitants' health conditions.

As a result, armament factories and their production procedures are reorganised and a targeted survey of site, groundwater, armament factories' equipment, building bunker fabrics, deposits, replenishments, bomb craters and canalisation are conducted. Besides, effective land control and probing in the area of hoppers, residential zones and playgrounds are carried out.

Scope of Service

project control
survey concept
evaluation of the survey results

Technical Data

Survey area	314 ha
Sites	approx. 1,100
Land probe	approx. 4,000
Chemical analysis of land	35,000
Groundwater metering point	approx. 100
Sewer network survey	approx. 35 km
Partial area	49
Hopper remainder	187
